APRIL FAMILY FUN!!!

From bugs and butterflies to weather and rainbows, this list of themes has plenty of ideas to keep you and your family busy all month long.

Bugs and Insects

With the warmer weather comes the bugs and insects making it the perfect time to teach your little ones all about these tiny creatures.

Gardening/Flowers

As the temperatures rise, so do the plants and April, being Lawn and Garden Month, is the perfect time to try planting a few seeds and taking note of all of the flowers that are popping up all around you.

Earth Day

Started in 1970, Earth Day is celebrated each year on April 22nd. While taking care of our Earth, our environment is a big responsibility, there are so many things that little ones can do to help and teaching them a few of these with a theme unit dedicated entirely to Earth Day is a great way to start.

Recycling

Continuing along the same lines as the Earth Day theme unit, one devoted to recycling can be a ton of fun! Gather supplies ahead of time and teach your preschoolers the fun of recycling by showing them how to reuse old things to create something new.

Rainbows

While most have never heard of this special day, April 3rd just happens to be National Find a Rainbow Day from working on colors to learning a little about the science behind these incredible light shows, there are so many amazing things that you can include in a rainbow theme unit. Not to mention all of the bright and colorful rainbow books that you can add to your shelf for the duration.

Squirrels

These furry little creatures seem to just come out of the woodwork once the Spring season hits and there are so many ways to incorporate them into a fun day, or week, of learning. Use one of their favorite foods (acorns) to work on math or create a sensory bin. The possibilities are endless
